Dear Students,

The Department of Family Medicine and Public Health are excited to offer two FMPH 191 Special Topics courses this summer. One FMPH UDE is required for all Public Health majors who entered UCSD fall 2016, fall 2017, or fall 2018 thus enrolling in a FMPH 191 is a great way to stay on track and complete a major requirement this summer. These classes have a max enrollment of 20 students and will fill up quickly!

**SUMMER SESSION 1: FMPH 191 "Field Epidemiology and Outbreak Investigations"

- Tu/Th 11 - 1:50pm with Dr. Nancy Binkin

FMPH 191 Field Epidemiology and Outbreak Investigations” will consist of a series of practical epidemiological exercises developed by the Centers for Disease Control and Prevention (CDC) and others, and will provide the opportunity for students to apply their epidemiological and biostatistical skills to real-world situations. These exercises, which involve the investigation of emerging infectious and non-infectious health problems and are based on actual investigations done in the US and elsewhere, are highly interactive and involve the synthesis of information from diverse sources, testing the students’ knowledge base as well as critical thinking capacities. **PREREQUISITE: FMPH 40, FMPH 101, and Department Approval to Enroll (Open to sophomores, juniors, and seniors) – Please submit your preauthorization request via the Preauthorization System for approval to enroll for summer quarter registration.**

**SUMMER SESSION 2: FMPH 191 "Clinical Nutrition in Public Health"

- Tu/Th 3 - 5:50pm with Dr. Christine Zoumas

FMPH 191 “Clinical Nutrition in Public Health” is an introductory course in clinical nutrition that combines lectures, discussion and classroom interaction that allow the students to identify applications and translation of nutritional guidelines and recommendations into behavior. Clinical nutrition is the study of nutrition and diet as related to the prevention and treatment of human disease. The practical and psychosocial aspects of diet modification and food or food product availability are key aspects of clinical nutrition practice, whether individual or community-based, and irrespective of whether the goal is primary prevention or disease treatment. **PREREQUISITE: FMPH 40/GLBH 20 and Department Approval to Enroll (Open to sophomores, juniors, and seniors) – Please submit your preauthorization request via the Preauthorization System for approval to enroll for summer quarter registration.**
